

ABSTRACT

Indra te Ronde, NEN

Impact of standardization in the algae sector
CEN BT WG 218 workshop 2017 | 9 May 2017 | Brussels

www.algaeworkshops.org

Standardization, the process for the next 4 years

A short introduction will be given about the 5 year Mandate from the European Commission (to CEN), and the progress made in year 1. In this first year, the CEN/BT/WG 218 developed a work programme consisting of 10 standards/documents to be developed for algae and algae (based) products. For the execution of this work program CEN Technical Committee (TC) 454 'Algae' has been created by CEN. This TC will develop these documents in the year 2-5. This presentation presents the outcome of year 1. And the activities for the year 2-5 will be (globally) presented whilst the other presentations during the EABA workshop will contain more technical background and details. Furthermore, NEN's presentation contains a short introduction and explanation about (CEN) standardization work.

And ending with the message: Create (your own) impact, and join and contribute to the CEN Algae standardization work!
