

Indra te Ronde, a business economist, is specialized in the field of standardization in relation to, amongst others, bio-economy and (bio-) energy. He has been working for NEN for almost 10 years, after business related positions in both Multinationals and SMEs.

He has been involved in several bio-economy/bio-energy related standardization committees, and related research projects.

He has been active in the role of secretary of, both national and international/European, standardization technical committees and working groups. His working field comprises topics such as Biofuels, Biogas, Bio-based products and Algae.

He has been actively involved in research projects (also H2020), such as SolidStandards, KBBPPS, OpenBio and InnProBio.

Indra te Ronde is also specialized in standardization of hydrogen, used for energy (and related research projects).

Besides his position at NEN, he is a politician and member of the city council of the city of Utrecht, The Netherlands.
